Chapter 2 DEDUCATINOS ABOUT DISEASE

Vasomotor Change	Affected Region	Frequency	Clinical Observation
Peripheral Vasodilation	Lower Limbs	Common	Skin appears flushed and warm; patient reports a burning sensation.
Localized Hyperhidrosis	Hands and Feet	Occasional	Excessively sweaty palms and soles, often without physical exertion.
Acrocyanosis	Distal Extremities	Rare	Bluish discoloration of the skin, particularly fingers and toes, due to poor circulation.
Facial Flushing	Face and Neck	Rare	Sudden onset of redness and warmth in the face, sometimes triggered by stress.

Table 2.1 – A synthetic table generated by gemini to test the mwe.
